CUSTOM MADE

Introduction

Roller shades

Roller shades, a popular window treatment for many years, have recently become more popular, thanks to a range of new designer fabrics, options, and the consumer's desire for elegant simplicity. Our collection of roller shades feature unique accessories, nature-inspired fabrics, vibrant colors and value from top to bottom.

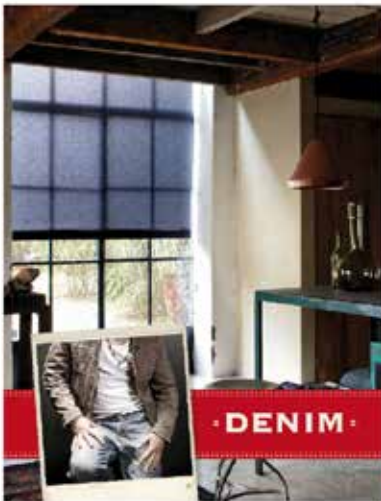

With bece, you can choose from two extensive collections: light filtering or room darkening. In addition, we have had some fun in creating a few "ready-to-wear" collections showcasing fashion-forward window covering design.

The collections:

- Light filtering roller shades
 - Room darkening roller shades
-

Latest trends in roller shades

Decorative | 5

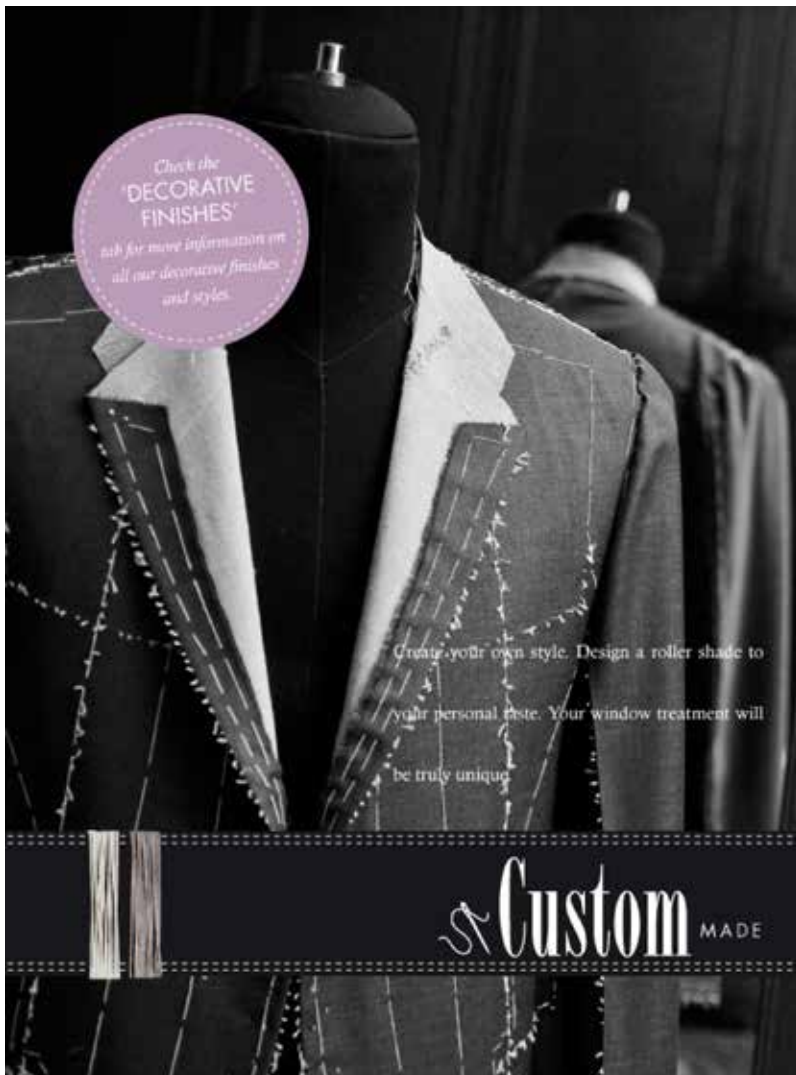

Take a walk on the design side with one of our “trend” roller shade collections. In these collections (Denim, Poetry, Heritage and Color Blocking) we’ve put together a ready-to-go program with pre-selected fabrics and accessories showcasing the latest trends in home décor. Check out the “trend” folders in the front section of both roller shade collection books.

Helpful tips:

- The styles in the trend folders are complete designs.
- Fitted to the small or medium system, depending on the size of the roller shades.
- Only Denim 3 is suitable for use with tension wires.

Custom Made

Create and customize a roller shade to your own personal taste. For inspiration, browse through the trend folder *Custom Made*, located at the front of both roller shade collection books. A complete overview of all decorative bottom edge finishes are found on pages 7 through 13. 💰 ✍️

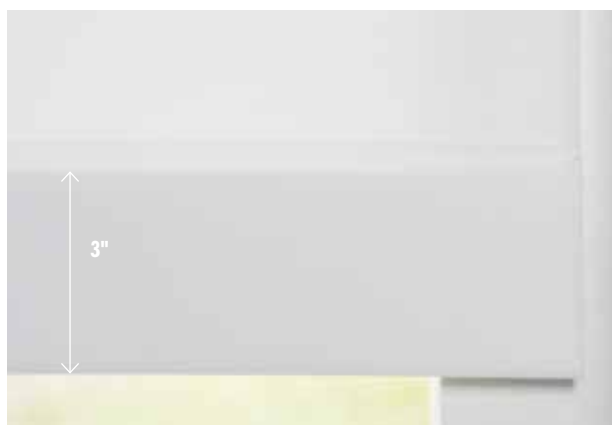

Bottom edge finish

Create the style of your roller shade by selecting one of the bottom edge finishes below.

Standard bottom rod

The bottom edge of the roller shade will be finished as shown above, unless you indicate an alternative option on your order form. The bottom shade weight is enclosed in a neat sealed hem.

Large bottom bar (OL1)

Create a unique roller shade by adding a large bottom bar. The large bottom bar is available in widths up to 104 $\frac{3}{8}$ " and is enclosed in a neat sealed hem. Large bottom bars are not suitable for cordless (spring-operated) shades. 💰 ✍️

Fabric-covered bottom rod (OL2)

A fabric-covered bottom rod is wrapped in the same fabric as the roller shade. The fabric-covered bottom rod is available in widths up to 118 $\frac{1}{8}$ ". 💰 ✍️

Aluminum bottom bar (OL3)

Make the bottom bar a visible part of the roller shade by adding an aluminum bottom bar. This will give your roller shade a more contemporary look! 💰 ✍️

= height of the bottom slat in inches.

= maximum width of the roller shade with bottom slat in inches.

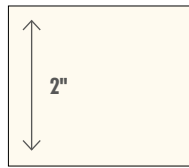

Wooden bottom slat (OL4 - OL16)

This beautiful wooden bottom slat is visible on both sides of the shade. The wooden slat is not available on cordless (spring assisted) shades. 💰✍️

Stitched edge

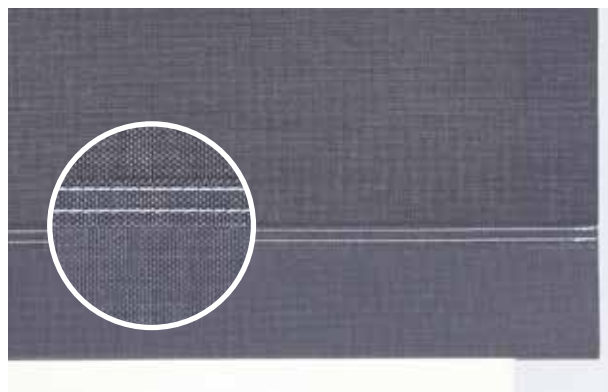

Decorative stitching adds an updated look to roller shades

The majority of our fabrics can be finished with decorative stitches as shown below. 💰

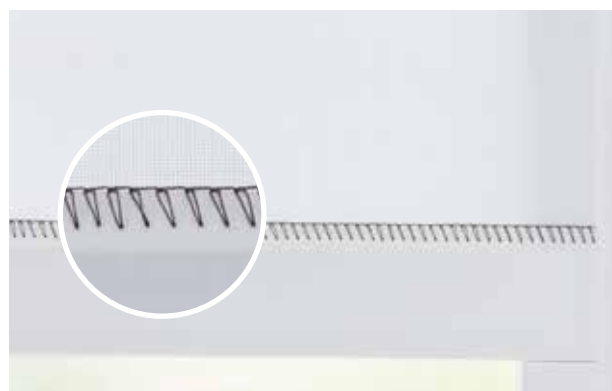

Available fabrics are labeled with the icon: ✍️

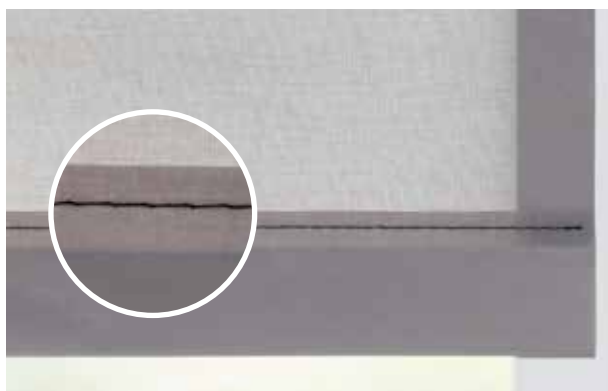

Single stitch (ST1)

Double stitch (ST2)

Blanket stitch (ST3)

Saddle stitch (ST4)

- Choose one of the four stitching patterns as shown above.
- Then choose any of the 25 brilliant colors from the yard card (found in the front of the roller shade collection books). Stitched bottom edge shades come with a hem. No bottom bar or wood slat available with decorative stitching.

The maximum width of a roller shade with a stitched edge is 104½".

Scalloped edge & accent rod

For a traditional look, finish your roller shade with an elegant scalloped edge.

Fabrics suitable for a scalloped edge or accent rod are labeled by the icon: 

Scalloped edge with braid trim

The braid trim is applied to both sides of the roller shade. The default trim color will match the color of the shade.

If you would like a different color trim, select any of the colors from this page at no additional charge.
